

# AVENTURA MARINA

February 25, 2016

To Whom it May Concern,

The Board of Directors of Aventura Marina One Condominium Association, Inc. heard about the Aqua Miser product in the middle of last year. We were very excited to learn about the system and initially installed a couple test units. The install and the function of the test units were flawless. The Board of Directors approved the project for the entire condominium and it has been a HUGE success! The installation for the entire building was expedited quickly and efficiently. Aqua Miser's install team were very courteous to our residents and explained the system as they went along.

We are receiving amazing results with this system. Six months after the install, our building has saved over \$16,392.00 and over 1,418,208 gallon of water. Our ROI will be under 8 months.

We recommend this system to any multi-dwelling buildings or office buildings.

Regards,

For the Board of Directors

Mark Kegley, CAM
